BLAIRMORE **ALBERTA**

The United States has crossed shells with Mexico, and the capture of Vera Cruz and Tampico was announced on Wednesday forenoon.

The bar of the Coleman hotel was temporarily closed on Monday of this week, following certain complaints made to the license department.

Irwin vs. Blairmore Is Heard at Macleod

The action of J. R. Irwin against the Town of Blairmore came up for hearing before Justice Walsh at Macleod today, and judgment was reserved until Wednesday next.

L. H. Putnam and Colin Macleod appeared for the town, while H. H. Roberts, of Coleman, represented Mr. Irwin.

This was an action taken by J. R. Irwin against the town for wrongful dismissal from the position of chief of police. Mr. Irwin claimed wages for balance of 1914, and damages to the extent of \$5000.

Mr. Irwin was appointed chief of police for the town by resolution empowering the Mayor and Secretary-Treasurer to enter into an agreement with him as chief of police. A document was signed by the mayor and secretary-treasurer under the corporate seal, but the contents of the agreement were not made known to the council until after Mr. Irwin was given notice of dismissal, when the document was brought to the notice of the councillors and it was found to embody protection for the chief of police, and very small consideration for the town.

The town solicitor thought it was just a question whether or not this contract could be considered binding, and stated similar cases that had been tried in the Ontario courts, where the ruling in all was in favor of the town.

The act does not require the council to enter into a contract with such official, and the council have the power to dismiss him at any time. These are points upon which the judge's decision will hinge.

Although a number of witnesses were present, none of them were called to give evidence, and the case lasted only forty minutes.

On being questioned by the judge, it was learned that Mr. Irwin has been out of employment since receiving his discharge from the town, that he has made several futile efforts to secure a position, and is yet "a member of the vast army of unemployed."

Mining Institute Had Meeting at Fernie

At the regular meeting of the Rocky Mountain branch of the Canadian Mining Institute held at Fernie on Wednesday the following gentlemen were present: W. H. Wilson, general manager Crow's Nest Pass Coal Co., president; John T. Sterling, Chief Inspector of Mines, Edmonton; secretary; Lewis Stockert, Francis Aspinall, W. F. McNeil, Calgary; Robert Hamilton, Redcliff; Samuel Jones, J. A. Richard, Robert Livingston, A. N. Scott, N. C. Pitcher, J. E. Reid, Lethbridge; J. S. Quigley, Wm. Hutcheson, John Brown, Hillcrest; W. G. Flint, Cammore; Wm. Shaw, Homer; Charles Graham, Corbin; R. H. Morris, Pocatontas; G. A. Lavoie, Frank; O. E. S. Whitehead, Coleman; Duncan McDonald, Lethbridge; J. L. Cote, M. P. P., Edmonton; Adam Reid, Cammore; C. A. Seaton, Corbin; J. R. Macdonald, Bellevue. Papers were read on mine rescue work by Chas. Graham and Francis Aspinall, and discussed by members during the day, and in the evening Mr. W. R. Wilson entertained the visitors and others to an opera house party.

George Skelding, of Macleod, has the contract to move the Union hotel to the new Frank townsite, and will likely begin operations next week.

International City-Planning Conference

During the last five years National Conferences on City Planning have been held annually in various cities of the United States, and have aroused such widespread interest that many American communities are now anxious to have the Conference held in their city and are willing to contribute the funds for that purpose. The city of Toronto, therefore, is to be congratulated on being the first place on this side of the International boundary to entertain the Conference, which this year will become international in scope and character. The financial difficulties have been overcome by a generous grant from the Dominion Government, which has appointed the Commission on Conservation to act as hosts. The Ontario government and the city of Toronto are also contributing. The question of city planning is thus recognized to be of national, provincial and municipal concern, and Field-Marshal H. R. L. the Duke of Connaught, the Governor General, has graciously consented to open the Conference and to give an address.

The substantial assistance given by the Dominion government is evidence that the town-dweller, equally with the agriculturist, is receiving attention, and that not only the Federal capital, but all our Canadian cities are receiving from the Federal authorities such advice and assistance as the Congress will afford them. Invitations have been sent to all the cities and towns in the Dominion, requesting them to send delegations to the Conference and it is hoped that many will take advantage of the opportunity. Money could be spent to no greater advantage than inviting some of our city councillors to the opportunity to come into contact with experts in civic problems from all over the continent. The aldermen will carry home ideas that, put into practice, will save their townspeople millions of dollars, besides acquiring a new sense of the responsibilities of their office and higher ideals of civic administration.

The scope of the Conference may be gauged by a glance at some of the topics which will form the main themes of discussion. Among these may be cited: The Relative Importance of City Planning as Compared with all other Functions of City Government, by Andrew Wright Crawford, editor of the city-planning section of the "Public Ledger"; Provision for Future Rapid Transit, by J. V. Davies, consulting engineer for the Brooklyn Rapid Transit Company; Rapid Transit and the Auto Bus, by John A. McCollum, assistant engineer, Board of Estimate and Apportionment, New York City; Protecting Residential Districts, by Lawrence Veiller, secretary and director of the National Association, New York City; Toronto's Water Front Development, by R. S. Gourlay, of the Toronto Harbor Board; A Consideration of the Principles and Procedure of a Canadian Town-Planning Act, a draft of which is now being prepared by a special committee appointed by the Commission of Conservation; and Recreation Facilities in the City Plan, by Henry V. Hubbard, professor of landscape architecture in Harvard University.

Additional interesting features will be a tour of the city and harbor of Toronto, luncheon topics, and an open session for the discussion of subjects to be submitted by members of the Conference.

L. Dutil, F. E. Hinds, R. M. Brisco, D. C. Drain, W. A. Beebe, D. A. Sinclair and H. E. Lyon went down to Macleod today to attend the suit of J. R. Irwin against the town.

There is no use of our "beating around the bush." We might as well out with it first at last. We want you to try Chamberlain's Cough Remedy the next time you have a cough or cold. There is no reason so far as we can see why you should not do so. This preparation by its remarkable cures has gained a world wide reputation, and people everywhere speak of it in the highest terms of praise. It is for sale by all dealers.

Oddfellows and Rebekahs are reminded of the whist social to be held on May 7th.

AN ENTIRE NEW STOCK IN

Deal with the store that has been here the longest, and has tried to give the best prices and right goods

Of Great Value to Coal Companies

The Post understands that some improved plan or method has been sought by coal companies to save their coal during the shipping process, and with this in view Mr. V. Mullins of this city has given considerable attention to the matter, with the result that he has, so the Post learns, produced a coal chute that will deliver coal shipped from the highest pier into the hold of the ship practically in same condition as when it leaves the ear, and will permit of the coal being loaded equally as fast as it is present.

This should be an improvement over the present method of shipping coal. Besides preventing the breakage of coal, Mr. Mullins' invention will also simplify the process of trimming and generally will reduce the cost of loading. Patents for the new process have been applied for, Sydney Post.

Polo Players to Hold Spring Tournament

The Western Canada Polo Association held a meeting at Calgary this week, when it was decided to hold the spring tournament under the auspices of the association at Macleod, commencing July 14. The autumn tournament, place and date, is to be decided later.

The meeting was most enthusiastic and representative of all the clubs in Alberta, as well as Kelowna and Vancouver, B. C.

F. S. Griffiths, president, and H. Cosgrove, manager of the Spokane inter-state fair, asked the meeting to arrange to have western Canada polo teams compete at the international polo tourney held in connection with the fair. Several western clubs will probably take part in the tourney.

There are eight polo clubs in southern Alberta, at Fish Creek, Cochrane, High River, Millarville, Macleod, Cowley, Pincher Creek and North Fork.

W. S. Hobbirk returned to town on Tuesday night, accompanied by Mrs. Hobbirk, who has been enjoying a visit to the Old Country.

LOOK TO YOUR PLUMBING

You know what happens in a house in which the plumbing is in poor condition—everybody in the house is liable to contract typhoid or some other fever. The digestive organs perform the same functions in the human body as the plumbing does for the house, and they should be kept in first class condition all the time. If you have any trouble with your digestion take Chamberlain's Tablets and you are certain to get quick relief. For sale by all dealers.

The regular meeting of the Blairmore council will be held on Monday night next.

STRAIGHT AT IT

A Story of the Russian
Revolution

By DONALD CHAMBERLIN

When I was a young man I was sent to St. Petersburg by my employers to establish a depot for the sale of the chemical goods they manufactured. I had letters to the American ambassador and, desiring to see something of Russian society, accepted such invitations as he secured for me. Society in Europe is different from ours in America in that the sovereign is its recognized head as well as the head of the government. In order to see society in St. Petersburg I must see the Count Cécile. The ambassador was very good to me and put me on his list for an invitation whenever there was a function of importance coming off.

One evening at a ball at the Winter palace I was in the refreshment room partaking of the delicate viands there when I saw a girl whom I had noticed for her beauty of form and face, her vivacity and general attractiveness. I had asked for an introduction to her and had been promised one later in the evening.

We were all standing in the supper room, some eating, some drinking, and since it was crowded I was pushed very near the object of my admiration. She stood with her back to me, placing an elderly man whose many decorations marked him for an important personage. Each held a glass containing wine. Feeling something touch me, I looked down and saw the girl's left hand. In her right she held her glass, while her left hand hung by her side. In the crush I had been pressed against me. The man emptied his glass and turned to a table near him to replenish it. While he was doing so the girl turned her head, gave me an appealing glance and lowered her eyes to her hand. Paralyzing her reasoning, I looked down and saw something between her thumb and finger. She placed a tiny phial within my fingers. This had scarcely been accomplished when the gentleman turned to

the best day for it. It was lucky that I had obtained from touching me tongue to it, for it was a deadly poison. I was for some time in a prey to conflicting emotions. Had it not been for the personality of the girl and its effect upon me I would not for a moment have been tempted to meet her with the likely result of being driven into a dangerous position. Victims of dungeons, of Siberia, of the scaffold haunted me. On the other hand, I could not banish her from my mind. I was horror-stricken that one so young, so beautiful, should be implicated and brought to such a fate. I was horror-stricken that one so young, so beautiful, should be implicated and brought to such a fate. I was horror-stricken that one so young, so beautiful, should be implicated and brought to such a fate.

Nevertheless I did nothing at the time and would have done nothing had not fate thrown a second and a much greater temptation in my way. More than once, having finished my work in St. Petersburg, I applied for my passport and started for the frontier, for the railway station I climbed into a compartment of a car, taking a seat by the window on the opposite side from which I had entered. There was but one other person in the compartment, and the light was insufficient for me to see his features. He was looking at a man or a woman. A long utterance reaching from the chin to the ankles concealed the figure, and I thought I saw a slight adornment to the feet but indicating that the wearer was a woman.

The passenger was looking out of the window, apparently watching for some one. Presently the guard shot the train, but my fellow traveler did not cease to watch. The train was moving out of the station when I heard a sharp whistle and saw a man and a woman, and looking out, I saw a man running to catch the train. The train gathered speed, but from my position I could not see the person. The passenger put her head out the window, but soon withdrew it and fell back into her seat. I saw a slight adornment to the feet but indicating that the wearer was a woman.

"Did he catch it?" I asked. There was no reply for a few moments; then suddenly the other person started up, threw open the door and revealed the figure of a woman. Great heavens! She was the girl who had handed me the phial at the ball! "He is on the footboard. When the train stops he will come to arrest me. That means for me the mines. Death by the guillotine is my going to die." She made a spring for the window, but I caught her. "Sacrifice—very great sacrifice—rarely comes when we are in our sober senses. It takes us by impulse. Looking backward, I wonder how I could have been so foolish. I was so young and so beautiful. I deduced the car of all the Russians. I persuaded the girl to give me her sister and her hat, while I transferred to her the contents of my traveling bag and a steamer rug for a lap robe. With these articles, the car driven down over her eyes, she was well covered and sitting in the far corner, could not be told from a man. I put on her sister and her hat and when the train stopped was sitting by the window. I saw the girl who had handed me the phial at the ball. I saw the girl who had handed me the phial at the ball. I saw the girl who had handed me the phial at the ball.

"I am lost!" I cried in a falsetto voice. The officer wanted no better evidence that I was his quarry. I was ordered to get out of the car, the door was closed, and my captor told the guard that the train could go on. My object was to deceive the officer as to my identity as long as possible, and this was not an easy matter, since I was a man and he was looking for a woman. I wrapped my sister about me and kept my mouth well covered and my face. It was night, and this helped me. Luckily I wore no beard. I was taken to the city of the towns in which I was captured and told up to me. I was taken as the key was turned on me. I was taken as the key was turned on me. I was taken as the key was turned on me.

Monkeys Wanted Men to Shoot Their Enemy the Leopard.

The strong manner in which the leopard put for prey catches monkeys in the low country. The leopard is related by a correspondent who obtained the information from the natives of the country.

The leopard will not attempt to climb trees in reach of prey. When monkeys climb the trees they blink under the trees they become greatly excited, and all chatter together. The leopard hears this and begins to click his teeth together.

This noise seems to make the monkeys beside themselves with terror and excitement; they huddle together in the tree tops above the leopard's head, jumping up and down on the branches, shrieking and uttering. Below, the leopard waits motionless, clicking his teeth, until the monkeys are so excited that they come to the ground with a thud—and then the leopard is on them.

"I had always received this information with some doubt," continues the correspondent, "but one day saw at any rate the first acts of the tragedy. I was traveling in the jungle, and saw a man and a woman, and looking out, I saw a man running to catch the train. The train gathered speed, but from my position I could not see the person. The passenger put her head out the window, but soon withdrew it and fell back into her seat. I saw a slight adornment to the feet but indicating that the wearer was a woman.

At the same moment I became aware of the monkeys noise. I saw a man and a woman, and looking out, I saw a man running to catch the train. The train gathered speed, but from my position I could not see the person. The passenger put her head out the window, but soon withdrew it and fell back into her seat. I saw a slight adornment to the feet but indicating that the wearer was a woman.

According to Sir Ernest Shackleton the finest work in polar exploration was done by a man who was born in the year 1854. A man does not attain his full growth until he is 25, and whatever the amount of growth of youth in the way of spirit, nerve, and enthusiasm, these do not work against the aging process of an older man or the balanced judgment of one who has experienced behind him.

In the antarctic expedition soon to be undertaken by Sir Ernest Shackleton, where there will be no little room for the younger man, the older man of action of one man may involve the lives of all, impulsive youth and the man of middle age who naturally has slightly diminished, must alike stand aside. Sir Ernest Shackleton, who is now 57, was 27 when he undertook polar work, and about 35 when he made his great march to within 97 miles of the South Pole. Capt. Scott was 33 when he set out in 1901 for the Antarctic, and 44 when he returned. The expedition was undertaken by Sir Ernest Shackleton's expedition and led the party to the south magnetic pole, was nearly 61. For a man of 61, Sir Ernest was a North Pole, and Amundsen 40 when he discovered the South Pole.

Royal Visitors' Books.

The books in which royal visitors inscribe their names when calling at Buckingham Palace. The books have been coveted by collectors for years. Recently two new books were provided for the occasion, and the old ones removed to the safe keeping of the Lord Chamberlain's department.

The value of these books to antiquary hunters is almost impossible to estimate, and some sensation was caused about the court a few years ago when it was announced that a book was missing. Fortunately a careful search revealed its whereabouts.

The books are bound in crimson leather, with an imperial crown stamped on the back, and are secured with a silver clasp. As a rule, each book lasts for about two years, but on the occasion of the death of King Edward a huge lot of books was taken up with signatures of kings. One of the books is kept at the ambassador's entrance, and the other is used by the diplomatic corps and official visitors, and the other is at the ambassador's entrance and is used by the general circle. Everyone entering or leaving the place is called on to sign one or other of these books.

Inventor of Logarithms.

By a congress to be held in Edinburgh in July it is proposed to celebrate a great event in the history of mathematics, the publication in 1614 of John Napier's "De Rationibus Canonis Mirifici Descriptio." Known to fame as the inventor of logarithms, Napier was a man of wide general interest, but it was to mathematics that he devoted chiefly his life. He was a pioneer in the present notation of decimal fractions.

Exaggeration.

"I'm the victim of financial exaggeration."

"I don't understand you."

"The bank has just informed me that I've overdrawn my account."

BECKONED TO HUNTERS.

Warm houses and foul air are often the cause of catarrh, and there is only one protection against such a cold, the gods of the fields and the woods, the west wind and the sunbath. The gods of the fields and the woods, the west wind and the sunbath. The gods of the fields and the woods, the west wind and the sunbath.

GIBRALTAR OF THE PACIFIC.

Uncle Sam's Steel Citadel, the Island of Oahu.

Oahu today is the greatest armed military camp under the American flag. It is the Gibraltar of the Pacific, a lone vidette on an evanescent island, year in and year out, guarding the approach to the Pacific coast. It is a sentinel that covers a lone heat for, with its lightning flashes of battle and its cruise of the Pacific coast.

Oahu is a vast armed camp, and the great fortress with its 150,000 men, the thud of cavalry hoofs. From 1898, when the first garrison of United States troops landed on the island with 100 men on duty, the military establishment has grown to 7,000, with 4,000 men yet to be assigned to duty. No military post in the world has so many coast artillery companies massed along the shores as Oahu. No military post in the world has so many army posts or as many armed men—Leslie's.

LIPTON'S NEW SHAMROCK.

The Yacht Which Will Give Again Try to "Lift That Cup."

Shamrock, when she was recently built, will be the first yacht ever built in England under the American rule of measurement. With this sea and the Thames, the first effort to win the America's cup, Charles Nicholson, the designer of the Shamrock IV, has been most successful in winning the cup. The Shamrock IV, the Pamela and the Paula III, are exemplifications of this, but these craft, some of which will undoubtedly be regarded with a feeling of wonderment by many seasoned yachtsmen. The Britannia, one of the most successful of English racing yachts, carried a little over 10,000 feet of canvas. Since the Britannia's palmy days racing has been learned of the crew, and the Britannia's crew, and the Britannia's crew, and the Britannia's crew.

Speech Following Fashions.

"We are seeking for purity in the written word, and in the English language, we seem to be going back with the fashions," said Thomas W. Higginson, president of the Boston Society of Authors, in a speech before the Boston Society of Authors, in a speech before the Boston Society of Authors.

AN UNWELCOME VISITOR.

Everybody Should Treat Him Just as This Sensible Man Did.

There was a light knock at the outer door, and the child who was playing on the floor with her grandfather suddenly looked up. "Who's there?" she asked. "It's me," said the voice. "I'm your grandfather," said the voice. "I'm your grandfather," said the voice.

OUR FOOD AND YARD.

STANDARD FIXED AFTER CENTURIES OF CONTENTION.

The Latest Official Measure Was Determined in 1825, But Prior to That Time Countless Rival Measures Had Been Adopted. The Standard Fixed After Centuries of Contention.

Foot rules and yardsticks are so common nowadays that not one person in a thousand ever stops to think of their origin. Yet the length of these common articles was settled only after centuries of contention and of years of unsuccessful effort to fix an unchangeable unit in nature.

The foot has been used in many nations, both ancient and modern, and scientists believe it was meant to be the length of the human foot. The Greek foot, for instance, was supposed to be the length of the foot of the hero Hercules. However, Hercules was a very large man; so the foot was measured at 12.09 inches. The Macedonians probably took their unit, according to our calculations, from the foot of some giant fender, for it was 14.08 inches in length. The Romans, on the other hand, measured the foot at 11.62 inches. The foot was measured at 12.09 inches in length. The foot was measured at 12.09 inches in length.

AN UNWELCOME VISITOR.

Everybody Should Treat Him Just as This Sensible Man Did.

There was a light knock at the outer door, and the child who was playing on the floor with her grandfather suddenly looked up. "Who's there?" she asked. "It's me," said the voice. "I'm your grandfather," said the voice. "I'm your grandfather," said the voice.

OUR FOOD AND YARD.

STANDARD FIXED AFTER CENTURIES OF CONTENTION.

The Latest Official Measure Was Determined in 1825, But Prior to That Time Countless Rival Measures Had Been Adopted. The Standard Fixed After Centuries of Contention.

Foot rules and yardsticks are so common nowadays that not one person in a thousand ever stops to think of their origin. Yet the length of these common articles was settled only after centuries of contention and of years of unsuccessful effort to fix an unchangeable unit in nature.

The foot has been used in many nations, both ancient and modern, and scientists believe it was meant to be the length of the human foot. The Greek foot, for instance, was supposed to be the length of the foot of the hero Hercules. However, Hercules was a very large man; so the foot was measured at 12.09 inches. The Macedonians probably took their unit, according to our calculations, from the foot of some giant fender, for it was 14.08 inches in length. The Romans, on the other hand, measured the foot at 11.62 inches. The foot was measured at 12.09 inches in length. The foot was measured at 12.09 inches in length.

Amore's Rousseau

Where She Got the Money to
Pay For It.

By MARTHA COB SANFORD.

Amoret was very excited. It was her first long journey alone, and vast and entrancing as her dreams were of the delights of California, she knew she should find even her dreams true.

She took off her stylish little hat and looked at it. "How 'mum!" she said mentally. "I'll have to get a new one."

But when she saw, with a last wink of his bright eye, a man at length disappeared behind the distant trees. Amoret turned her attention steadily to the people about her. An interesting and pleasant collection was her unspoken verdict, save for a very evidently very married couple who were too silly to be even amusing. What was that, Amoret mused, about a young man who so longed to be married?

"Lay call to dinner!" announced the dining car porter, swinging pompously through the train.

Amoret opened her purse, in which she was carrying her miniature watch. She glanced at the time and then, feminine fashion, began to investigate the various contents of her pocketbook. Suddenly, she started, then growing very white, leaned back and closed her eyes.

The "married" and "disgraced" young man across the aisle had been watching her. He guessed what had happened.

How could he help her? Could he take her to go into dinner with him? Of course not. She'd starve before she'd accept. Well, he might as well take himself and think over the situation while he did so.

As he rose and walked ahead into the dining car Amoret opened her eyes. She stifled a gasp, started, then sprang up and followed him. He was the only person in the car that she liked the looks of. He was a thoroughbred from top to toe. But there was no other way out of this awful predicament. She closed her eyes again. All that she could think of was the little of hills which she had seen so long ago, and she was determined she should see it.

When Richard came out from the dining car he found Amoret alone. The rest of the passengers were evidently at dinner. Now was his chance. He had to be sure, but the proper words must come if he could get up sufficient nerve to speak. He cleared his throat once, and then, as silence remained otherwise unbroken.

The train whizzed on. Richard pretended to be reading his paper, but the priest might have been reading hieroglyphics. Suddenly he crushed the sheet behind him and "turned toward Amoret."

"Great heavens!" he exclaimed and, jumping up, caught her in his arms just as she fell forward fainting. He rang the porter's bell furiously.

"Get some water quick!" he commanded, "and send for the maid! Don't lose a minute!"

"Yes," said the porter, the water and a handkerchief were brought to the speed and grace of a hurrying ambulance.

Meanwhile Richard laid the girl gently down on the seat and got a flask of brandy from his valise. With the water and the brandy he began to bring up the girl, and then to show signs of consciousness.

"Here, Sarah," ordered Richard (why Sarah he couldn't have told for the life of him), "you take care of her while I go and get some soup. She ought to have gone to dinner sooner, but—she didn't!"

Amoret did not refuse the soup. Indeed, she didn't think to question where it came from. She even allowed Sarah to coax her into eating a little chicken and afterwards to insist on the making up of her berth.

"I'll make it all right with you in the morning," Amoret assured her. "You must have been very tired, and the whole miserable predicament suddenly flashing over her again. But Sarah and not noticed the interruption.

"To my husband's already done that," Amoret said. "The curtains were shut tight, and Sarah had gone before Amoret could get up courage to attempt an explanation."

"How is she now?" inquired Richard. "Well, she's just good as new, said (you'd take down it) she's my cousin. You've been married for some time, haven't you?" And, with a friendly smile, Sarah left the young man staring blankly after her.

Here was a situation. In the morning the porter's "first call" breakfast" rang cheerfully through the car. Amoret heard and tried to get as she went on with her spiritless process of dressing.

Richard heard and realized that he must take the bill by the horns. In other words, he must brace himself to speak to the young lady in distress after her assistance.

In the course of half an hour Amoret appeared. She glanced up and saw down the car, evidently looking for some one. Richard saw her, and came straight toward him.

"I am Miss Blanchard," she said without a shadow of coquetry. "I am going to take advantage of your kindness to my last night and ask another favor."

"I am pleased to be of the slightest service," responded Richard, with fitting docility.

"You see, I—I—Amoret stopped short in confusion. She had thought it would be so easy!

STREET MYSTERIES.

Why Do London Men of One Business.

Conspire?

Undoubtedly one of the most curious features of London is the manner in which the business of the city is conducted. The business of the city is conducted in a very peculiar manner.

"I am pleased to be of the slightest service," responded Richard, with fitting docility.

"You see, I—I—Amoret stopped short in confusion. She had thought it would be so easy!

"I'll tell you while we're at breakfast. Well, have to go. I'll be back in the afternoon."

"Well, if you think—But that's as far as Amoret got in her hesitation. She turned and looked at him with a smile, and then she went to the end of the journey.

Here was a complication that Amoret had counted on. Telegraph for more money! Where on earth did he think it would come from?

"Well, you see I live alone with my aunt, who is quite an old lady," she explained, "and it would just worry her to death to get a telegram saying, 'I've lost my money. She didn't want me to take the journey alone in the first place, and I—'

"Of course we won't telegraph then," broke in Richard, who was sitting next to her. "I'll go and get the money for you."

"I'll go and get the money for you," broke in Richard, who was sitting next to her. "I'll go and get the money for you."

"I'll go and get the money for you," broke in Richard, who was sitting next to her. "I'll go and get the money for you."

"I'll go and get the money for you," broke in Richard, who was sitting next to her. "I'll go and get the money for you."

"I'll go and get the money for you," broke in Richard, who was sitting next to her. "I'll go and get the money for you."

Mrs. McDicken, of Fernie, was a visitor in Bellevue last week, the guest of Mr. Andrew Goodwin.

Mr. MacKenzie moved his family up from Maple Leaf last week and is occupying the house vacated by Donald McMillan.

Irina, the little daughter of Nohb MacDonald, is laid up with internal poisoning. It is hoped that Irina will soon recover.

A local strike among the miners was called on Tuesday, because of an order refusing the use of powder in the drawing of pillars.

James Gray, of Inverness, spent Easter in town with relatives and left on Tuesday for Bellevue, Alta.—Westville Free Lance.

Tom March and Fred Parker, local footballers, have been engaged in Frank mine and will likely appear on the Frank team this year.

A class in first aid has been formed. It meets in the schoolhouse on Sunday afternoon at 4 o'clock, under the leadership of Dr. MacKenzie.

A horse attached to a rig from Coleman ran away on Tuesday about four o'clock. The buggy came to grief when the horse took a flying leap over the mine fill.

James Cousens has severed his relations with the West Canadian Collieries Co., and is driving for A. F. Blais. Jim's pleasant smile will be thrown in free with every order from Blais' in the future.

A shooting affair took place in the Frank slide one evening last week, as a result of which an Italian from Maple Leaf is out on bail. The affair was the climax of an old feud, and a revolver and knife were freely used. All shots went wild, however, and the shooter pulled out with an ugly gash in the face.

The following is the weekly programme at Bellevue's busy church: Sunday—10.30 a.m., band practice under G. W. Goodwin; 2 p.m., Sunday School; 2 p.m., in vestry, class in personal purity, sex hygiene and health under G. E. Geary; 3 p.m., public worship; 8.30 p.m., song service and informal discussion.

Monday—4.30 p.m., Junior Epworth League, Miss Florence Hallworth, president; 7.30 p.m., class in mining engineering under Tom Stephenson.

Tuesday—4.30 p.m., class in gymnastics for boys under 16; 8 p.m., class in gymnastics for men.

Wednesday—8 p.m., meeting for communion and prayer.

Thursday—4.30 p.m., class in gymnastics for boys; 8 p.m., class in gymnastics for men.

Friday—7.30 p.m., choir practice.

Saturday—8 p.m., class in gymnastics for men.

Notice of Dissolution

NOTICE IS HEREBY GIVEN that the partnership heretofore existing between John A. McDonald and Thomas McDONELL, doing business under the firm name and style of McDonald & McDONELL as Hotel Keepers, in the Village of Frank, in the Province of Alberta, has this day been dissolved by mutual consent, and all debts owing the said partnership should be paid to Thomas McDONELL, of Frank, Alberta, account, to whom all claims against the said partnership should be presented, and by whom the same will be settled. The business as heretofore carried on under the firm name of McDonald & McDONELL will hereafter be carried on by Thomas McDONELL.

DATED at the Town of Blairmore, in the Province of Alberta, this 18th day of April, A.D. 1914.

Signed: JOHN ANGUS McDONALD
THOMAS McDONELL

Witness: L. H. PUTNAM,
Solicitor

DECLARATION OF DISSOLUTION OF PARTNERSHIP

I, JOHN A. McDONALD, formerly a member of the firm of McDONELL & McDONALD, carrying on business as Hotel Keepers, in the Village of Frank, in the Province of Alberta, under the style of McDonald & McDONELL, do hereby certify that the said partnership was, on the 18th day of April, A.D. 1914, dissolved.

WITNESSE my hand and seal at Blairmore this 18th day of April, A.D. 1914.

The Newfoundland

Sealing Disaster

The sympathy of the entire civilized world goes out to Newfoundland in her loss through the recent sealing disasters. The heroism of her sons stands unparalleled in marine history, and the great storm of March, the 31st, 1914, marks a red-letter day for the ancient colony. Added to the fate of the crew of the Newfoundland and the Southern Cross comes the report of the probable loss of the steamer Kite and Fogata, each with a crew of some seventy men. The last heard from the former was about March 15th, shortly after her departure for the icefields, and it is feared that she met her fate on or about that date. The Fogata has been reported in the ice in the field of St. Lawrence, but has not been seen or heard of since the last of March.

It is in the presence of such a disaster that one realizes the comparative smallness of the world, and the sympathetic kinship that envelopes the globe. From all countries messages of condolence have poured in to the Old Colony, included in which were sympathetic messages from the ex-governors of the Island, bearing strong expressions of sympathy. At a largely-attended meeting held in the city of St. Johns recently the following resolution was adopted:

"Whereas disaster, unprecedented in its magnitude, has plunged the whole Island of Newfoundland into mourning, leaving heart-breaking and suffering in many a home from which husband, father, brothers and sons, beloved, have been suddenly taken, whilst many widows, little ones and dependents are left insufficiently provided for, and without apparent means of support;

"Be it resolved, therefore, that a relief fund be established forthwith to meet the needs of the sufferers, and that the co-operation be given in every section of the Island, and of Newfoundlanders and friends of the Colony abroad, be solicited with a view to lessening the burdens of those who have been thus called upon to suffer through the loss of their breadwinners."

The widespread sympathy felt for the bereaved and destitute families of the 350 Newfoundland fishermen who have been lost off the Newfoundland coast is shown by the fact that from all over the world contributions to the fund for the widows

and children are being made.

From Scotland Andrew Carnegie wired \$1,000. Two thousand men of the mining force at Bell Island will give one day's pay to the fund.

In all the big cities of the States and Canada magnificent sums are being contributed towards the fund. It is the intention of the Newfoundland government to establish a permanent fund for this

and other disasters which may occur.

COUGH MEDICINE FOR CHILDREN. Too much care cannot be used in selecting a cough medicine for children. It should be pleasant to take, contain no harmful substance and be most effective. Chamberlain's Cough Remedy meets these requirements and is a favorite with the mothers of young children everywhere. For sale by all dealers.

Local and General

Saturday was pay-day at the mine.

The mines in this vicinity are now working regularly.

Mrs. L. H. Putnam has been visiting in Macleod this week.

J. B. Reuter, of Lethbridge, autoed to town on Wednesday morning.

Mrs. Kidd's maternity home, Box 95, Phone 151. Wedding cakes elevated.

The initiatory degree was conferred by Blairmore I.O.O.F. on Tuesday night.

Meers, Burnett and Cruikshank, of Bellevue and Hillcrest, were in town yesterday.

J. R. Harmer has secured a position in the local post office, as successor to Miss Chatfield.

Dr. J. W. Mackay has purchased an auto, which will greatly assist him in his local practice.

Only a few aristocrats received invitations to the Irwin Blairmore match at Macleod this week.

L. Thorne visited Fernie on Wednesday, in the interest of his company's brick industry there.

Principal Verge returned on Sunday from Lethbridge, where he attended the teachers' convention.

It is reported around Blairmore that a forty-nine-year-old American bachelor at Sentinel is really in love with scotch.

The many friends of Dr. A. H. Baker will be pleased to learn that he is returning to Alberta, and will take up practice in Edmonton.

The teachers' convention at Lethbridge concluded on Thursday last. Calgary was selected as the meeting place of the association next year.

Mrs. W. H. Muncester will return from Calgary with her husband tonight. Mrs. Muncester was Blairmore's representative of the Women's Presbyterian.

Another very enjoyable social dance was held by the "Home Life Club" at the home of F. E. Hinds on Wednesday night. Olsen's orchestra furnished excellent music.

Rev. W. T. Young's subject of address to the Oddfellows on Sunday will be "The Relation of Christianity to Brotherhood." The Bellevue orchestra will be in attendance.

Councillor Rosse is spending the week at Macleod—gathering wind for his automobile locomotion. While in the prairie town he will assist in smothering Blairmore's police affairs.

A Chinese company is being formed for the purpose of operating a steam laundry in Blairmore. We understand that a lot and building have been purchased near the Pelletier addition for the purpose.

Douglas Wilson is busy inventing an ambulance car. "Dug" can make the cars do anything but talk, and a young couple who gloat the stars from the slide road even accuse his cars of talking.

H. G. Benson, one of our popular young men, has changed his mind and bought some household furniture this week. We understand that the party who intends visiting troubles with him is named "Menzies."

A tuberculosis sanatorium is being planned by the Provincial Association for the Prevention of Tuberculosis. The new building will be located between Milford and Radnor, about thirty miles west of Calgary.

The grocery business recently conducted by the Blairmore Trading Co. is being taken over by W. A. Schnurr, who intends running a strictly-cash grocery business. Mr. Schnurr comes from Calgary and has had many years of experience in this particular line of business, and we believe will command a considerable share of local trade. Watch for his opening announcement next week.

Rev. W. H. Muncester, who has been holidaying at Calgary, during which time he also attended a meeting of the Synod, returns this week, and will occupy the pulpit at the Presbyterian church next Sunday morning and evening.

The Blairmore brass band will give an open air concert opposite the Cosmopolitan hotel on Saturday night at 7.30 o'clock. It is the intention of the band to give such concerts frequently if sufficient public sympathy and support is forthcoming.

A banker got hanked against an embankment east of the Frank slide on Tuesday night. The walking between there and Blairmore was really delightful. The car was not a "McLaughlin." Anyway, the car should have received a share of attention!

Now is the time to get out for business and take advantage of the best available means of securing it through the advertising columns of this paper. General industrial and financial conditions are improving, and The Press will experience one of the brightest seasons in its history.

A local "hello" girl recently attended a Sunday night service and felt asleep during the sermon. At the close the preacher said: "We will now sing hymn number three forty-one—three forty-one." The young lady just waking in time to hear the number yawned and said: "The line is busy, please call again."

Bills are out announcing an auction sale to be held at Cowley on Saturday, May 2nd, by Auctioneers W. T. Eddy and J. M. Carter. A number of horses and cattle, as well as a list of implements and wagons will be sold. Also a quarter section of arable land, partly broken, together with farm buildings thereon.

At the Presbyterian Synod held in Calgary this week over one hundred delegates from all over the province were in attendance. Rev. T. M. Murray, of Coleman, was unanimously elected moderator, in the place of Rev. J. H. Short of Lonsdale. Rev. and Mrs. Muncester, of Blairmore, were delegates at the Synod.

There will be a big turnout at the Oddfellows anniversary parade on Sunday afternoon. Divine service will be held at Central Baptist church, where Rev. W. T. Young will deliver the anniversary sermon. After the service return will be made to the I.O.O.F. hall, where the customary speeches and refreshments will be the programme. All Oddfellows and Rebekahs are extended a hearty invitation to take part in the day's proceedings.

The following is a synopsis of a speech delivered at the Alberta hotel bar last week by a faithful apostle of — ? ? ?

"Ladies and Gentlemen: I am here this evening in the interest of a strong appetite and my friends. It pains me to see an able-bodied young man hugging the off-wall, his eyes, piercing every visitor who has a dollar to spend and does not bring a sufficient number of friends to avoid the necessity of the cashier passing back the change. I do not believe in the treating system, that is in treating others. I am a strong advocate of (intemperance, and will not tolerate beer being allowed to stand drying upon the bar. My motto is 'Down with the liquor—until our appetites are quenched.'"

Lawrence and Elliot, two of the most clever dancing partners on the stage today, will positively appear with the Frank Morton Co. at the opera house on Monday and Tuesday nights. These premier dancers are members of the American Dancing Masters Association, which ensures a correct interpretation of the tango-hesitation waltz and castle walk, and Mr. Elliot is at all times pleased to explain the intricate steps of the various dances so as to make them plain and graceful.

Frank Happenings

Saturday was pay-day at the mine.
H. T. Lloyd was in town on Thursday night.

The usual meeting of the church took place on Sunday night.

Rev. J. C. Anglin came to town from Hillcrest on Sunday night.

J. R. MacDonald and G. A. La-Voi were Fernie visitors this week.

Don't forget the big picture show on Monday night in the old Union hall.

Steve Bæhus, of South Fork, was visiting his sister in Frank this week.

Mr. Berry, of the General Electric Company, was in town this week.

The Social League of Frank have now got their new basket ball ground in good shape.

The association of stationary engineers held their regular meeting at Frank on Thursday night.

Mrs. A. J. McKinnon left on Wednesday to visit her brother's ranch at South Fork, for a few days.

John Jennings, of Frank, was sentenced to six months imprisonment in Lethbridge jail this week for the theft of \$14 from the Rocky Mountain Sanatorium.

MARRIED—On Saturday, April the 18th, by the Rev. W. T. Young, Miss Janet Dunlop, of Frank, to Mr. Francis William John Syme, of Lethbridge. The young couple have gone to Lethbridge to reside.

The Bohemian Gymnasium Club have re-organized, and they are expecting a parallel bar to arrive any day from the States, when they will meet for practice three or four times a week in the school house.

A picture show was put on at the old union hall on Monday evening last. All those who attended pronounce the pictures the best ever seen in The Press. Mr. Legg will put on a show this Saturday night, and also on Monday when several other surprise films will be used.

The Frank football team visited Coleman on Saturday to play a friendly game, which ended in a draw—no score. Coleman will visit Frank this Saturday to play a return game, and a large number of men have been busy this week getting the grounds in shape. The baseball supporters have also taken a hand, and it is expected that Frank will put a strong team on the diamond this year.

FOUND A CURE FOR RHEUMATISM
"I suffered with rheumatism for two years and could not get my right hand to my mouth for that length of time," writes Lee L. Chapman, Mapleton, Iowa. "I suffered terrible pain so I could not sleep or lie still at night. Five years ago I began using Chamberlain's Liniment and in two months I was well and have not suffered with rheumatism since." For sale by all dealers.

Pay Roll Reaches

\$8,612,400 Per Year

The average payroll per day of the Alberta coal mining industry for the year 1913 was \$28,708; or, for the three hundred days during the year the coal mines were working, the total payroll for the year was over eight and a half millions, or, to be exact, \$8,612,400. These were the calculations made for the Bulletin yesterday by John T. Stirling, chief mine inspector for the provincial government.

In speaking of the growing importance of the industry, the mere fact that 4,306,346 tons of coal were mined in the province last year, or that the average number of men employed in and about the mines was 8068, or that there are 280 mines being operated in the province, does not impress itself very deeply upon the mind of the ordinary individual. But when the question is reduced to one of dollar and cents some idea of the vital part

that the industry is playing in the history of the province is brought home vividly to the imagination. When it is further remembered that the potential coal supply of the province runs up into the billions of tons, and is practically of such an unlimited character that nobody need worry for hundreds of years in Alberta as to the matter of a fuel supply, it will at once be seen to what huge proportions the annual payroll will attain in a few years, when instead of exporting a few thousand tons per year, as now, whole train loads will find their way every day over the greater part of the Western prairies.

The average payroll per day in the four districts of the province, and the total number of tons mined in each district last year, is as follows:

Average payroll per day	No. of tons mined in
1913	
5,746	868,480
12,329	1,849,435
4,183	627,461

Lethbridge 6,440 9,620

Totals \$28,708 4,306,346

The mines in the Edmonton, Calgary and Lethbridge districts handle only domestic coal, and production therefore drops almost to a minimum during the summer months, so that the payroll is very much greater during the winter. In the Crossed Nest Pass, where steam coal is mined, production continues steadily throughout the year, slightly more coal being mined in that district during July and August of last year than during the actual winter months.

The number of men employed in the industry in the Edmonton district in 1913, their distribution being as follows:

	Above Ground	Below Ground
Bituminous mines	149	340
Sub-bituminous mines	440	844

Totals 589 1184
These figures, it is expected, will be largely increased next year, as a number of new mines are being opened up in the big coal-bearing areas west of Edmonton, and development work is proceeding rapidly.
